

MISSION & VISION STATEMENT

MISSION

BCCS is a community school for like-minded Christian families and teachers who prioritize faith, family and school in that order. We have acknowledged the mutual endeavor to create an instructive environment, in which children can excel academically, expand leadership proficiencies and exemplify moral values based on Biblical principles.

LIKE-MINDED FAMILIES

Like mindedness is achieved in the school through the mutual participation of parents in the many Family Enrichment Units available and the mutual participation of parents in their homes.

VISION

Brandon Christian Community School (BCCS) is a think outside the box educational model which focuses on moral and academic excellence, while partnering with families to prioritize faith, family and school.

ACADEMIC EXCELLENCE

BCCS will strive for academic excellence through a variety of curriculum, resources and tools, which are described to be classical-like. The community realizes the importance of teaching to the developmental appropriateness of the students as well as the integration of the learning styles (auditory, visual, and kinesthetic)

BCCS will combine a small classroom setting and a home school environment which allows a focus on individual student's particular strengths and/or weaknesses.

BCCS teachers will strive to facilitate learning through a variety of hands-on or cooperative learning activities in order to maximize the classroom learning time. Parents will use teacher directed lesson plans to focus on their students individual needs on home school days.

BCCS will strive for excellence in academics which will be reflected in the students' SAT scores, keeping in mind that all students have different God given gifts and abilities. The test scores are to be a measurement of students of student progress, without an emphasis or pressure on testing.

BCCS will strive to teach cultural awareness by building relationships with people in other nations. Students will come to realize there are similarities and differences across our nation and around our world.

BCCS will strive to create service learning opportunities.

BCCS will strive to offer a quality enrichment day (E-Day) for parents to have the option to enroll their student(s). A variety of age appropriate classes will be offered.

BCCS will strive to choose curriculum which supports a Christian world and Life view. Bible is to be taught and incorporated as a part of the curriculum in all grades. Significant improvements have been and will be made in Science to strengthen this goal, and for students to learn how to defend their faith.

MORAL EXCELLENCE

BCCS will strive to develop students who have the desire to serve the Lord with all their hearts, minds, and souls as they are a light to the world.

BCSS will strive to teach the students that prayer / pausing to talk to God is to be a natural part or their day. Furthermore, teachers are encouraged to have students pray throughout the day (i.e. Snack time, before a test, for a friend who went home sick).

BCCS will place a strong emphasis on character training. A monthly emphasis on a character trait will deepen the students' understanding and teach to their hearts. Morals excellence is shown from a child's heart and how he or she exemplifies Christ to the world.

BCCS's classroom / homeschool approach involves parents in the prioritizing of faith, family and school. It also allows parents the extra opportunity to emphasize character training at home.

PARTNERSHIP WITH PARENTS

BCCS will strive to employ experienced, certified teachers to partner with parents. The professional teacher is a source of guidance and information through prepared lesson plans, bimonthly community meetings, scheduled trainings and frequent communication.

BCCS will strive to have a Parent Partner in each classroom on a daily basis. The parents will be able to use this opportunity to gain insights into the curriculum, their child and their peers, as well as to be an invaluable support to the teacher.

COMMUNITY

BCCS will maintain a high standard in regards to the application and registration process in order to ensure the committed families are a part of the community school. BCCS's foundation comes from being a community of believers who strive to bring their child(ren) up in a Bible based home. BCCS's like-mindedness is strengthened by the specified biblical parenting programs.

BCCS will create an environment which fosters, support and encourages a sense of community.

BCCS will frequently evaluate the relationship between the parents, teachers, administration and board.

BCCS will be committed to the strong emphasis of family. A variety of community builders and field trips are planned for families to have the option to attend, as well as the option to bring younger siblings.
